

## **MY SPIRITUAL EXPERIENCES..... For people interested in reading / displaying it. Steve 2023**

I am a Spiritual Advisor, I live in Macclesfield, and I offer this to people who one day may need spiritual inspiration... To offer HOPE to people who may find at some point in their life have very little hope here.

Vulnerability on Earth is hard when feeling ill or old. Life here is a journey... HEAVENS HOME - yes it's out there in the Higher Astral Realms in deep space - and we've been there before.

I had a NDE in 2015 - and believe me the spirit in us 'exists' ready to fly when our time is due.

Science says there are more stars/planets in the universe than grains of sand on 'all the beaches' in the world, and billions of galaxies - and there are billions of stars/planets in each galaxy - it's vast.

So on my journey this lifetime, I almost passed away, and lost my life here in Jan 2015 - all colour had drained from me, I was allowed to go so far to witness and feel my spirit lively / excited in 'my dying body' - later that day I felt hand on my head and recovered so fast, and even drove to Warrington the next day... I became psychic after that, and I now help others on forums as 'one-light'....

We have lived many lives on Earth before - we live in these bodies, spirit is 'within us' separate... It's important, in the eyes of Jesus - if someone only starts to believe and do more good now, its like the lost sheep has been found.

When someone is in their final weeks/days here, their Guardian Angel / Guides or past family members will come to you in mind / voice, and prepare you for coming home to heaven... I heard my mum saying on her last day here in 1980, regarding 2 'recently past brothers' Reg and Sid I can see them.

And when we were looking after my mum in law in 2012 - she made contact earlier, in her last months she was speaking to someone - my job was web design in the nearby room, and every time I heard her speaking I sneaked to the bedroom door, and she would go quiet - now how did she know, unless someone told her to be quiet Steve's listening... Both mum's were sane, mind strong.

I am a family man with children and many grandchildren, it's just that ive learned things to share... When someone is ill and doesn't seem to know what's going on - that's like brain fog, but the mind is attached to the spirit, and will be clear and strong on departure.

In a dream words came to me 'you'll know when you get to heaven because you've been there before'. And I say this is correct - and probably the first thing you will say is how long was I down there for.

### **Dogs strong senses to spirit life - knowing / sensing things...**

During his last days here, my dog stared into corner of our garden for hours, was looking at someone.

My dog as we put him down at the vets was 'not worried' at all - he was ready... After he past on, I kept asking my dog for a sign he was alright, then one evening I heard a hum/hum/hum noise he used to make, and that was early days - I have more psychic abilities now, as in getting guidance since my NDE, I seen 'Angel Sparkles' early mornings - and so much I've learned to share with people.

We have to go though 'good and bad' to get to final destination on our journey here on Earth.

Friends and family who've passed away, you will meet again - but we have to continue our life plan no cutting it short... I am a Spiritual Advisor - spirits are just people like us passed over... We use these bodies this lifetime, spirit lives on, and on - the gift of life, so be good and kind best you can.

Entering our final years... Glory of HEAVEN awaits - much better than here on Earth, and you will know this place when you get back - Renewed in Paradise... The key is - kindness and BELIEVE IT....

I have done several spiritual short talks in care homes all free, with time for questions / answers from people regarding spiritual and dreams etc - if interested on zoom or local venues with me and a group of you at your place of work - just get in touch...
