

Intrigue and Wonder Talks 1... Hi, my name's Steve, thanks for inviting me here to talk today - nice to meet you all...

Do many of you wonder if there is other life out there in our vast universe... Space websites say there are billions of galaxies out there.

So we know the universe is vast, the lower and higher astral realms, and billions of galaxies, each with billions of stars in it, it's vast - space websites confirm this amount, more planets space websites say, than grains of sand on our beaches - hard to get our head's around that.

But in our vast universe is there really this place called Heaven?? A bit about me, and my life journey so far...

I had a NDE back in 2015, I had been ill for sometime, I had given up - then what seemed my final day in bed I witnessed my spirit ready to exit the body - then I felt a hand on forehead and recovered so fast.

Then I started seeing sparkles in my mind early mornings - it took me 6 months to gain knowledge, that these were what's known as Angel Sparkles, I became psychic - not reading fortunes, receiving guidance.

We all have Spirit Guides you know, when we learn to listen in the 'gut feeling' just knowing something when totally relaxed - many great songs were written this way, when words just came to songwriters.

I researched mind/body/spirit for 6 years after hearing tap tap tap on the window frame every morning in bed, wife couldn't hear it - it's part of what I've been specialising in the last few years, God's Mysterious Ways after receiving guidance from the Holy Spirit in 2020, one of the main 3...

Some of you here will have heard when someone dies for a minute when in the operating theatre, and sees themselves being brought back to life, looking from above, it happens - as in a out of body experience.

Well there's large groups of people on Facebook who can do this out of body travel for fun, and an experience - it's a rare gift, it happens, i've had some out of body experiences myself, so I know it happens.

I was reading about this man talking about the astral realms on a group on Facebook, and travelling - when reading it, I thought he writes well. He is an

experienced out of body Astral Traveller, yes it can happen.

And he was saying when travelling in spirit in the universe, seeing the dark lower astral realms hell, and could only get so far to the higher astral 'heaven' and Many Mansions it's said, and he wasn't allowed any further... But what he was allowed to see was quote - 'simply beyond words' - people get involved in projects there and in good health.

And I know many now listening will think this is unbelievable - but isn't that what Heaven seems to so many - sounding unbelievable.

All the research and tuition over the last 6 years - I became a Mind Strength and Spiritual Advisor... And maybe 3 years ago now this came to me in a dream - I get clear knowing guidance, also in dreams.

And what I remember is being shown me or someone arriving on a plane, then landing - and many 100's of people were there waiting in what seemed to be Heaven... They were all back in their younger years again, and clapping / applauding for completing the life plan / journey.

Isn't that a lovely thought - especially for many, later years are hard - when you get back home to this place called Heaven, people you liked all there waiting - smiling and clapping, you made it home.

All you've got to remember on your life journey is to be kind, and believe Jesus and Heaven exist - I was shown a vision of Jesus in my church in 2016 - 6 seconds it lasted, showing me something.

We're all on a journey, and all have a life plan to complete... Some of us are more advanced than others in years on our journey here - but this place Heaven where everyone is young again, exists.

And before your time arrives to leave here, you will get instructions comfort from your Angel / Spirit Guides - no passport required, and all arranged - So just be kind to yourself, and to others on life's journey.
